

Risk assessment

All employers must conduct a risk assessment. Employers with five or more employees have to record the significant findings of their risk assessment.

We have started off the risk assessment for you by including a sample entry for a common hazard to illustrate what is expected (the sample entry is taken from an office-based business). Look at how this might apply to your business, continue by identifying the hazards that are the real priorities in your case and complete the table to suit. You can print and save this template so you can easily review and update the information as and when required. You may find our example risk assessments a useful guide (www.hse.gov.uk/risk/casestudies). Simply choose the example closest to your business.

Organisation name: Veggies Catering Campaign

What are the hazards?	Who might be harmed and how?	What are you already doing?	Do you need to do anything else to manage this risk?	Action by whom?	Action by when?	Done
<i>Used washing up water might pollute ground water.</i>	<i>N/A</i>	<i>All waste water is discarded in site designated disposal facilities. We only use environmentally friendly detergents, such as Bio-D.</i>	<i>No</i>			
Waste water from crew washing might pollute ground water.	N/A	Obviously as a caterer we take cleanliness and hygiene extremely seriously. However all crew are briefed to use site designated waste water disposal facilities for used washing water.	No			

Employers with five or more employees must have a written health and safety policy and risk assessment.

It is important you discuss your assessment and proposed actions with staff or their representatives.

You should review your risk assessment if you think it might no longer be valid, eg following an accident in the workplace, or if there are any significant changes to the hazards in your workplace, such as new equipment or work activities.
