

CLIMATE CAMP

The camp for Climate Action is happening between the 3rd-11th August, targeting Kingsnorth coal fired power station in Kent. There will also be 8 climate camps in different countries across Europe and beyond.

The Camp for Climate Action aims to highlight the root causes of climate change, whilst promoting positive solutions. Industrial farming is part of the problem, and we will be promoting seasonal, vegan, organic, local food production to counter this. Kitchens from across the country will come together to cook vegan food. There will be workshops on veganism and the food industry. Awareness about climate change is growing and now is the time to challenge our eating habits and promote a low-impact, cruelty free diet. Last year over 1,500 people attended the camp, the largest vegan event in this country.

We invite you to come and get involved. Groups are mobilising to take regional neighbourhoods to the camp, and you can find out how to get involved in one of these from the website.
